

SIGELEI V8

SIGELEI V8 is a variable voltage mod with LCD to show items such as resistance, puffs, power, etc.

- Material: Rubber
- Thread: 510&ego thread
- Battery: 18350
- Weight: 113g
- Demension: 53*30*84mm

01 FUNCTIONS

- 3.0-6.0Volt variable voltage
- Resistance check
- Battery status
- Puff check
- Current display
- Output voltage display

ON/OFF: Press button C for 5 times continuously to turn on/off the mod.

Voltage Up/Down: Press button A to increase the voltage.

Press button B to decrease the voltage.

Menu: Press button A and B together to browse the menu from 501 to 506.

02. MENU

- 501 Choose to display puffs you have smoked.
- 502V Choose to display the battery voltage.
- 503A Choose to display the working current.
- 504W Choose to display the working power.
- 505V Choose to display the output voltage.
- 506 Ω Choose to display the resistance of the atomizer.

03 NOTES:

- 1.Clean the thread after using in case of rusting and corrosion.
- 2.Do not reverse the battery in the tube.
- 3.Turn off the mod when not using.

Error-code: HHH= over voltage ($>9V$)

Lo V= under voltage ($<6V$)

F1= short circuit

F2= low resistance ($<1.2\Omega$)

Warranty and Gurantee:

12 months

Improper operation will void the warranty.

Do not drop SIGELEI V8.

Electronic cigarette are not suitable for the juvenile, the non-smoking, people with nicotine allergy, people with allergy to propylene glycol, pregnant women and people with cardiovascular disease.
